Key word: logistics, management, market, organisation

Abstract: Japan Institute of logistics systems takes for logistics concept the follow definition: “the management which synchronizes such providing actions as procurement, production, sales, and distribution with demands. It aims to enhance corporate competitiveness and increase corporate value by realizing fulfillment of customers’ satisfaction, cutback of unprofitable inventory and minimization of its transfer, and reduction of supply costs. To achieve those objectives mentioned above, collaboration of companies concerned is essential and development of logistics using supply chains is strongly required”.

Historical this concept is developing concurrent with the organization development in the last century (figure 1). Also is analyzed of the market development and the evolution of the logistics concept for each specific period.

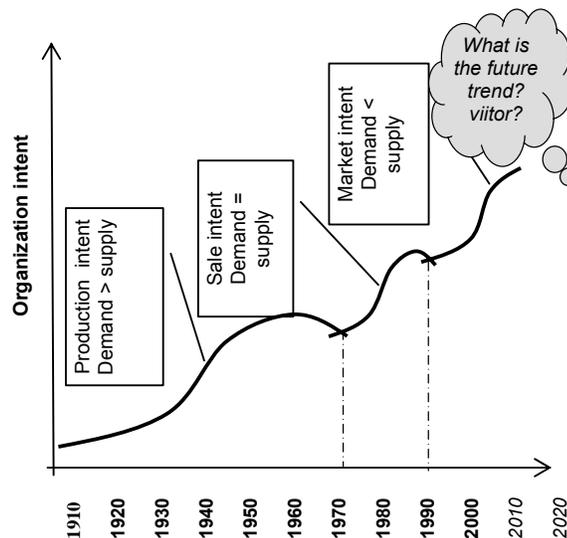

Fig.1 The organization intent development in the last century

Also is presented the evolution of logistics concept dependent by the objectives directions of the branches and by development of technological instrumentality in certain organization.
